

Safety starts at your door...

LET ME IN!

We must ensure that the electrical installation and electrical equipment we own in your property is safe.

When we visit to check the electrics in your property we may:

- 🏠 Conduct a visual inspection of the electrics.
- 🏠 Send a qualified, competent electrician, who may undertake a Periodic Inspection which will result in the creation of an EICR.
- 🏠 Carry out any necessary repairs or remedial work.

Please allow up to 4 hours for checks to be completed adequately.

This poster was created by the Electrical Safety Roundtable. Please contact your housing provider if you are concerned about the electrical installation in your property.
